

# Elisa Sadakhom

## Women Back to Business Success Story

We are delighted to present another WBB success story! Elisa Sadakhom completed the WBB Programme in June 2021, having embarked on this journey as a double opportunity «to learn about relevant management topics at a renowned executive school and to gain support and career consulting in a new work environment».

With extensive experience as a corporate lawyer - primarily in the Asia-Pacific region- she was eager to reposition herself in the Swiss job market. With a three-month-old and a toddler when she started, Elisa states: «I knew that I was interested in a career transition that would allow me to contribute positively to the environment. The WBB Programme helped me structure my self-reflection journey and understand what steps I needed to take to successfully network and search for a job in Switzerland.»

Now an Operational Sustainability Consultant with Zurich Insurance, Elisa works on the company's global carbon footprint reduction, environmental performance, renewable energy transition and employees' engagement initiatives on sustainability topics. She also volunteers for Amnesty International and focuses on climate justice.
